# AI-Powered **Legal Assistant** for European Law

Transform your legal research with instant, accurate answers backed by authoritative European legal sources. No more hours of manual searching.

## What is eulaw.ai?

**Imagine ChatGPT, on verified legal data. Without hallucinations.**

eulaw.ai is an AI-powered legal research assistant specifically designed for European law.

Unlike general-purpose chatbots such as ChatGPT, eulaw.ai grounds every answer in a focused but very comprehensive collection of National and EU authoritative legal databases.

### Research Case Law

"Find ECJ cases on GDPR Article 17 right to erasure"

### Analyze Compliance

"What are the requirements for data processing under Danish law?"

### Review Contracts

Upload contracts to identify risks and applicable regulations

### Cross-Jurisdiction

Compare regulations across EU member states instantly

### Comprehensive

+700.000  
Authoritative legal sources such as laws, verdicts from EU and member states

### Expert Grade

response quality based on validated legal sources, updated daily. Without hallucinations.

### Affordable

Simple monthly subscription with full access to all features. Cancel anytime.

## HR and Recruitment

- Draft and review employment contracts in minutes
- Upload employment contracts and get fast expert grade review
- From hiring to termination – EU labor law made practical
- Reduce legal risk in staffing and temporary contracts

## Tech, SaaS & Software Companies

- Scale across Europe without guessing the law
- From GDPR to the AI Act – legal clarity for fast-moving tech teams
- Understand EU digital regulation before you ship

## Pharma, Life Science & MedTech

- Navigate latest EU and national pharma regulation
- Reduce regulatory uncertainty in distribution and compliance
- Legal groundwork for highly regulated industries
- Trusted legal insight for pharma and medtech professionals

## Manufacturing & Industrial Companies

- Reduce legal risk across your EU supply chain
- Understand liability, warranties and ESG obligations before signing
- Supplier and distribution contracts – reviewed with EU insight
- From production to distribution – legal clarity across borders
- Practical legal insight for complex industrial businesses
- How does transfer pricing rules across EU impact your business?

## Wholesale, Distribution & Trade Companies

- Master EU distribution and agency rules before signing
- Understand termination rights across EU markets
- Upload business contracts and get fast expert grade review
- Cross-border trade needs cross-border legal clarity
- Spot competition law risks in your distribution setup

## Professional Services (Consulting, Engineering, IT Services)

- Clarify liability and risk before the project starts
- Standardize client contracts
- Reduce contract risk without slowing sales
- Understand jurisdiction and governing law before disputes arise

## Financial Services, FinTech & Payments

- Scale across Europe without guessing the law
- From GDPR to the AI Act – legal clarity for fast-moving tech teams
- Understand EU digital regulation before you ship

- Understand EU ESG obligations and keep your reporting deadlines
- Navigate the Green Deal without legal uncertainty
- From sustainability goals to legal compliance
- Clarify governance and liability in ESG initiatives

## Logistics, Transport & Mobility

- Navigate EU transport rules across borders
- Understand liability and employment rules
- Reduce risk in cross-border transport contracts
- Practical legal answers for complex logistics chains

## International SMEs & Scaleups

- Know EU regulations before making decisions
- Reduce legal spend by doing the groundwork yourself
- EU compliance made accessible for business
- Upload contracts and get fast expert grade review
- From first hire to first contract

## Platform Features

### Natural Language Queries

Ask questions in plain language. No need for complex search syntax or legal terminology expertise.

### Source References

Ask questions in plain language. No need for complex search syntax or legal terminology expertise.

### Document Analysis

Upload contracts or legal documents for AI-powered analysis, clause review, and risk identification.

### 24 EU Languages

Research and receive answers in any official EU language with intelligent translation.

### Conversation History

All your research sessions are saved. Continue conversations and build on previous queries.

### Jurisdiction Filters

Focus your research on specific jurisdictions: EU-wide, national, or international sources.

## What is eulaw.ai?

### Contract Verification

AI-powered contract suggestions

### Case Insight

Analyze court decisions

### Regulatory Compliance

Stay ahead of EU regulations

### Contract Drafting

Draft legal contracts

### Legal Q&A

Get answers to legal questions

### Legal Research

Search across EU legislation

### Risk Assessment

Identify legal risks and compliance

### Legal Opinions

Receive expert guidance

# Legal Databases Overview

EU Legal Sources	Validated	Limited
Free Trial	5 free prompts	No-Limited
GDPR Compliant	Yes	Yes
Hallucination	None (source-grounded)	Varies
Jurisdiction Filter	Yes + year	Limited
Languages	24 EU langs	DA, SE, EN, DE
Mobile Access	Yes	Limited-Yes
Price	€39/mo/user	€500-1,100/mo/user
Response Speed	Fast (streaming)	Medium-Fast
Sales Process	Self-serve	In-person/Enterprise
Source References	Clickable links	Yes (most)
Annual Filter	Yes	No-Limited
Update Frequency	Daily	Varies
User Interface	Modern	Legacy-Modern mix
Contract Builder	Yes	No

### Best Value

Premium legal AI at a fraction of traditional costs

### Zero Hallucinations

Every answer backed by verified sources

### No Lock-in

Online signup, no subscription terms, cancel anytime

## Security & Compliance at eulaw.ai

### No Model Training

Your data is kept private and secure—it is never used for training AI models.

### GDPR Compliance

Full GDPR compliance with security and data privacy measures built into every layer of our platform.

### EU Data Residency

All your legal research data is stored and processed exclusively within the European Union with no cross-border data transfers outside the EU.

### DDoS Protection

Multiple layers of protection including global CDN for automatic DDoS mitigation and Web Application Firewall with rate limiting.

### Multifactor Authentication

Optional MFA via physical security tokens and biometric authentication applications for enhanced account security.

### Single Sign-On (SSO)

Google SSO supported. Enterprise customers can contact us for integration with their authentication system.

### Encryption

All customer data encrypted both at rest and in transit using modern protocols such as TLS 1.3.

### Third-party Security Audits

Our infrastructure is audited by independent security experts on a regular basis.

### Vulnerability Management

We check our code and infrastructure using security experts and tools such as Snyk to test for vulnerabilities.

### ISO 27001:2022 & SOC 2

Our service runs from ISO 27001:2022 and SOC 2 certified data centers.

## Enterprise-Grade Security, Affordable Pricing

eulaw.ai provides the security and compliance features that legal professionals require, without the enterprise price tag or long-term subscription terms.

# Simple, Transparent Pricing

Full access to all features. No hidden fees. Cancel anytime.

**Save 90%+** vs traditional legal databases (€500-1,100/month). Find answers in 30 seconds vs hours of manual research.

## Full Access

**€39**/month

Cancel anytime

- ✓ Unlimited legal queries
- ✓ All data sources included
- ✓ Document upload & analysis
- ✓ 24 EU languages
- ✓ Conversation history
- ✓ Priority support

## The Problem with General-Purpose AI for Legal Research

In law, accuracy is critical: a single fabricated case citation can lead to professional sanctions, as seen when general-purpose chatbots were used for legal research. **RAG** addresses this by grounding AI in authoritative, validated legal databases rather than relying on its own memory—retrieving verified sources instead of guessing.

## How RAG Solves Legal Hallucinations

### Verification Against Binding Authority

General LLMs may blend laws across jurisdictions, while RAG systems retrieve information only from verified sources.

### Elimination of Fictional References

A common hallucination is the invention of non-existent cases. RAG prevents this by grounding references in retrieved documents.

### No Knowledge Cutoff

Laws and precedents change frequently. An LLM trained in 2025 cannot know about a 2026 ruling. A RAG system can index a new court opinion the same day it is released.

### Jurisdiction Control

eulaw.ai allows you to limit research to selected European jurisdictions plus "International" covering treaties and documents with legal significance in Europe.

## Supporting Research

**Oxford Academic** study "Large Legal Fictions" shows general LLMs hallucinate over 50% of the time on legal queries. **Stanford HAI** research confirms RAG tools (Lexis+, Westlaw) dramatically reduce errors versus general models.
