EU

WHAT IS EULAW.AI

The AI legal workspace for European law.

An AI legal workspace that researches, reviews and drafts across EU and national law. Ask in plain language, get a grounded answer, and open the exact article or paragraph behind every claim.

Research case law

"Find CJEU rulings on GDPR Article 17, the right to erasure."

Check compliance

"What does Danish law require for lawful data processing?"

Review contracts

Upload a contract and surface the risks and the rules that apply.

Compare jurisdictions

See how a rule differs across EU member states in one pass.

Comprehensive

150M+ articles and paragraphs from 380+ verified sources, refreshed daily.

Expert grade

Answers built from validated legal sources, with no fabricated legislation or case law.

Verifiable

Every answer links to the exact article or paragraph, so you can check the source in one click.

THE PROBLEM WITH GENERAL PURPOSE AI

In law, accuracy is everything.

General AI invents legislation and case law that does not exist. Stanford RegLab measured incumbent legal tools fabricating sources on up to a third of queries. eulaw.ai answers only from official databases, and links every claim straight to the paragraph.

Verified against binding authority

General models blend laws across jurisdictions. eulaw.ai retrieves only from verified sources.

No invented cases

The classic failure is a citation to a case that never existed. Grounding every reference in a retrieved document prevents it.

No knowledge cutoff

Law changes constantly. A model trained in 2025 cannot know a 2026 ruling. eulaw.ai can index a new judgment the day it is published.

Jurisdiction control

Limit research to the European jurisdictions you choose, plus “International” for treaties with legal weight in Europe.

SUPPORTING RESEARCH

The Oxford Academic study “**Large Legal Fictions**” found general LLMs fabricate legal sources on more than 50% of legal queries. **Stanford HAI** research confirms that retrieval based legal tools sharply reduce errors versus general models.

PLATFORM FEATURES

Everything the research takes, **in one place.**

Natural language queries

Ask in plain language. No search syntax, no legalese required.

Source references

Every claim links to its source document, so you can verify the answer in one click.

Document analysis

Upload contracts and legal documents for AI powered clause review and risk spotting.

200+ languages

Ask and answer in 200+ languages, including all 24 official EU languages, with intelligent translation.

Conversation history

Every research session is saved. Pick up where you left off and build on past work.

Jurisdiction filters

Focus your research by jurisdiction and by year: EU wide, national, or international.

WHERE PEOPLE USE EULAW.AI

Contract verification

AI powered contract suggestions

Case insight

Analyse court decisions

Regulatory compliance

Stay ahead of EU regulation

Contract drafting

Draft legal contracts

Legal Q&A

Answers to legal questions

Legal research

Search across EU legislation

Risk assessment

Identify legal and compliance risk

Legal opinions

Get expert guidance

★ INTRODUCING VAULTS ★

Your private document collections.

A vault is a personal collection of your own files, contracts, client files and memos, that the AI can search and reason over, kept separate from eulaw.ai's public legal knowledge base.

Create & organise

Up to **50 vaults** per user, newest first in the sidebar. Rename inline; search and manage docs.

Live indexing

Each document shows its progress as it is added, so you always know what is ready to search.

Use in chat

Select **up to 5 vaults** from the menu; the choice persists and scopes retrieval to those docs.

Add documents

Drag & drop **PDF, DOCX, TXT, MD**, or pull from your library.

Custom instructions

Tell the AI how to treat each vault, e.g. cite the exact clause, flag unusual liability terms.

Private by default

Each vault is its own **private vector index**, searchable only by you, only when you select it.

WHAT SHIPS NEXT

Two releases, **six weeks.**

1

WEEKS 2-3

Redlining & vaults

Track-changes review against cited law, plus secure vaults.

- Clause-level redlining with sourced suggestions
- Confidential vaults for matter documents

Lives in Gold · €129 / m seat

2

WEEKS 4-6

Team collaboration

One team, working from a single trusted source.

- Shared workspaces & research threads
- Comments, mentions & roles

BUILT FOR YOUR INDUSTRY

Practical legal answers, **tuned to your sector.**

HR & Recruitment

- Draft and review employment contracts across the EU in minutes
- Upload a contract and get fast, expert grade review
- From hiring to termination, EU labour law made practical
- Lower your legal risk on staffing and temporary contracts

Tech, SaaS & Software

- Scale across Europe without guessing the law
- From GDPR to the AI Act, legal clarity for fast moving teams
- Understand EU digital regulation before you ship

Pharma, Life Science & MedTech

- Stay current on EU and national pharma regulation
- Reduce regulatory uncertainty in distribution and compliance
- Solid legal groundwork for highly regulated work
- Trusted insight for pharma and medtech professionals

Manufacturing & Industrial

- Cut legal risk across your EU supply chain
- Understand liability, warranties and ESG duties before you sign
- Supplier and distribution contracts, reviewed with EU insight
- From production to delivery, legal clarity across borders

Wholesale, Distribution & Trade

- Master EU distribution and agency rules before you commit
- Know your termination rights across EU markets
- Upload commercial contracts for fast, expert grade review
- Spot competition law risk in your distribution setup

EVERY SECTOR

Whatever you do, the rules that apply to it.

BUILT FOR YOUR INDUSTRY

From the boardroom to the border.

Professional Services

- Clarify liability and risk before the project starts
- Standardise client contracts across EU markets
- Reduce contract risk without slowing the sale
- Settle jurisdiction and governing law before a dispute does

Financial Services, FinTech & Payments

- Move into new EU markets without guessing the rules
- From MiCA to DORA to PSD3, clarity for fast moving finance teams
- Understand reporting and licensing duties before you launch

Energy, ESG & Sustainability

- Meet EU ESG duties and hit every reporting deadline
- Navigate the Green Deal without legal guesswork
- Turn sustainability goals into documented compliance
- Clarify governance and liability across ESG initiatives

Logistics, Transport & Mobility

- Navigate EU transport rules across every border
- Understand liability and employment obligations
- Lower the risk in cross border transport contracts
- Practical legal answers for complex logistics chains

International SMEs & Scaleups

- Know the rules before you enter a new EU market
- Reduce legal spend by handling the groundwork yourself
- Upload contracts for fast, expert grade review
- From first hire to first contract, across borders

CROSS-JURISDICTION

Cross border work needs cross border clarity.

HOW EULAW.AI COMPARES

Premium legal AI, a fraction of the cost.

WHAT MATTERS	EULAW.AI (EU)	OTHER LEGAL & GENERAL AI TOOLS
Commitment	Cancel anytime, no contract	Annual lock in
EU and national legal sources	Both, verified and updated daily	EU partial, national rarely
Fabricated law or cases	None, every answer source grounded	Varies, general AI invents citations
Free trial	10 free prompts	None to limited
Hosting	EU hosted, GDPR compliant	Varies, often US
How you buy	Instant online signup	Sales calls, enterprise onboarding
Languages	24 official EU languages	A handful
Point in time law	Filter by jurisdiction and year	Current text only, or limited
Price per seat	€39 to €129 / month	€500 to €1,100 / month
Source links	Clickable to the original text	Sometimes
Your data used to train the AI	No	Often unclear

Best value

Premium legal AI at a fraction of traditional cost.

No fabricated legislation or case law

Every answer backed by a verified source.

No lock in

Sign up online, no contracts, cancel anytime.

THE DATA LAYER

150,000,000+

legal articles and paragraphs, from **380+ verified sources**, updated daily and constantly expanding.

WHAT SITS INSIDE

Primary legislation, court and tribunal decisions, regulator guidance, technical standards, treaties and international instruments, spanning **every major EU compliance framework** across financial, digital, environmental, life science, employment, trade, tax and corporate law.

COMPLIANCE COVERAGE

Every EU compliance framework, in one place.

190+ frameworks across every domain of EU law.

SECURITY & COMPLIANCE

The security legal work needs, **no enterprise tag.**

- **No model training**

Your data stays private. It is never used to train AI models, and providers never receive or store your content.

- **EU data residency**

Documents, queries and history stored and processed only within the EU. No transfers outside it.

- **Multifactor authentication**

Optional MFA with physical security keys and biometric apps for stronger account security.

- **Encryption**

All customer data encrypted at rest and in transit using modern protocols including TLS 1.3.

- **Vulnerability management**

Continuous scanning of code and infrastructure with tools such as Snyk.

- **Built for GDPR**

Security and privacy engineered into every layer of the platform.

- **DDoS protection**

Layered defence, including a global CDN and a Web Application Firewall with rate limiting.

- **Single sign on**

Google SSO included. Enterprise customers can integrate their own identity provider.

- **Independent audits**

Infrastructure reviewed regularly by external security experts.

- **ISO 27001:2022 & SOC 2**

Run from ISO 27001:2022 and SOC 2 certified data centres.
